Radio China: [Kuaishou and Tsinghua University's Joint Project Wins the Qian Weichang Chinese Information Processing Science and Technology Award](#)

At the 2024 Academic Annual Conference of the Chinese Information Processing Society of China, the joint project "Key Technology Research and Application of Responsible Content Recommendation" submitted by Kuaishou and Tsinghua University won the first prize in the Natural Science category of the Qian Weichang Chinese Information Processing Science and Technology Award, thanks to its technological innovation and advancement. The Qian Weichang Chinese Information Processing Science and Technology Award is the highest honor in the field of Chinese information processing, aiming to recognize research teams that have achieved significant innovation and breakthroughs in technology. To win the award, a project must not only be leading in China but also demonstrate world-class technological standards.
