

## Passing on the Spark of Knowledge and Sowing the Seeds of Hope: Kuaishou Public Welfare Leverages Technology to Lighten the Dreams of Rural Children

2025.05.26

**Public Welfare Revitalization Network:** [Passing on the Spark of Knowledge and Sowing the Seeds of Hope: Kuaishou Public Welfare Leverages Technology to Lighten the Dreams of Rural Children](#)

On May 25, Kuaishou visited the Xiaowei Town Central Primary School in Yishui County, Linyi City, Shandong Province, to conduct the “Enlightening the Future-AI Reading Experience Class” themed public welfare activity. The 1,000 high-quality extracurricular books donated during this activity were carefully selected by nearly 300 Kuaishou public welfare partners. These books cover a wide range of topics, including literary classics, popular science, art enlightenment, and cultural history. This public welfare activity also allowed students to experience the Kling AI and learn about cutting-edge technology. The “Enlightening the Future-AI Reading Experience Class” themed public welfare activity is not only another innovative practice of Kuaishou Public Welfare in the field of rural education but also reflects the far-reaching significance of AI-based large-model technology in promoting rural education development.
