China Philanthropy Times: [“Exchange Life Through Lens, See the World Through AI” – Kuaishou Charity Foundation’s “Co-Creative Video Workshop” empowers rural students to chase their dreams.](#)

On 2 November, Kuaishou brought its public-welfare program “Co-Creative Video Workshop” to Chengnei Primary School in Fangshan County, Shanxi Province. To help students better experience cutting-edge technology and spark their imagination, the session was held in the school’s “Future Enlightenment Classroom”—a digital lab donated under Kuaishou’s initiative—and featured the workshop “See the World with AI,” powered by Kuaishou’s Kling AI tools. Kuaishou has always been committed to the healthy development of children and adolescents. In 2023 the Kuaishou Charity Foundation launched “Future Enlightenment Classroom,” a project that builds digital classrooms, runs tech-themed summer camps and delivers AI lessons so rural children can access frontier technologies and broaden their horizons. To date, Kuaishou Charity has supported more than 500 schools through assistance in music, sports, and IT, benefiting 700,000 children and teenagers, and has helped 19 rural schools upgrade their digital-classroom hardware.
