

Kuaishou receives “Leading Innovation of Digital Economy” and other accolades at the Global Digital Economy Conference 2023

2023.07.13

Guangming Daily : [Kuaishou receives “Leading Innovation of Digital Economy” and other accolades at the Global Digital Economy Conference 2023](#)

During the Global Digital Economy Conference 2023, Kuaishou’s StreamLake-200 (the “SL200 Chip”), the first self-developed intelligent video processing chip, was honored as the “Leading Innovation of Digital Economy” at the “New Product Launch” event. The SL200 Chip incorporates several proprietary technologies developed by Kuaishou, including video coding and decoding, image processing, AI inference, content adaptive encoding and other core technologies. It boasts high quality, high density and intelligent features.
